*Central Project Management Agency*

This presentation contains preliminary information which may be incomplete or subject to change without notification. Nothing in this presentation binds CPMA to proceed as presented.

# INPP Reactor Zone R3 Dismantling and Reactor Interim Waste Storage

## Framework for Implementation

Peter HARRISON  
Head of Ignalina Programme

National Agency of the Ignalina Programme  
Financed by the European Union

"Experience of Reactor Dismantling"  
Workshop Oct./Nov. 2018

# Funding framework

## The Ignalina Programme

- This project is funded by the **European Union** under the **Ignalina Programme**
- **Central Project Management Agency (CPMA)**, an agency under the Ministry of Finance, manages the Ignalina Programme under an agreement with the European Commission
- The role of CPMA is to:
  - approve tendering documents, and
  - oversee the tender and evaluation process

But, CPMA is not a party to the ensuing contract

- All Ignalina Programme contracts are denominated in **euro**

# Legal framework

Procurement of services

Procurement will be conducted according to the **Public Procurement Law of Lithuania**  
*(aligned with EU Public Procurement Directive)*

- Publication

- Details
- Registration
- Electronic submittal

**CPV code: 712 / 713**

There is no restriction on country of origin under the Public Procurement Law.

# Language and documents

During procurement

*The use of languages is regulated by Lithuanian law*

## Procurement

- Materials published for this contract
  - Technical specifications: LT (with EN translation)
  - Conditions of tender: LT (with EN translation)
  - Proposal forms: LT (with EN translation)
  - Draft (and final) contract: **LT only**
- Materials from tenderers
  - Questions during tendering: LT and/or EN only (responses will be provided in both languages)
  - Tender proposals: LT and/or EN only
  - Supporting documents (except ESPD): Original language + (if required) certified translation to LT, EN or RU

**The English translation is provided for information only.**

# Language and documents

During implementation

## The contract

- The contract working language can be **Lithuanian**, **English** and/or **Russian**
- Output documents for the main stakeholders and regulatory bodies will be in **Lithuanian** and **English**

## The nuclear power plant

- The main language of INPP for technical matters is **Russian**
  - Additional documentation (e.g. drawings) required by the consultant in the course of the project may be in **Russian only**.
- ➔ **The consultant should make arrangements accordingly**

# State security

## Application of the law

This contract will be subject to the:

*Law on Protection of Objects of Importance to National Security (2018-01-12 No. XIII-992)*

### Application of the law

- The proposed contract will be submitted for scrutiny of the Coordination Commission after selection of the successful bidder(s)
- The decision to preclude a contract is promulgated by Government Resolution

### Note

- Enforcement of this law is independent of INPP and CPMA and the criteria used are not disclosed
- To date, no contract for INPP has been precluded
